Semester course: STAT 5760 -- 4 CREDIT HOURS

1. Transcript Abbreviation: (maximum 18 characters)
   scsconsulting

2. Long course title
   Statistical Consulting Support from the SCS

3. Course description: (maximum of 250 characters)
   Graduate or undergraduate students enrolled in this course will work with a graduate student consultant employed by the Statistical Consulting Service for the purpose of making progress on their thesis or dissertation.

4. Prerequisites / Co-requisites (use quarter and semester codes):
   None

5. Exclusions (use quarter and semester codes): (none)
   None

6. A list of topics that make up the course: (One per line, max of 15 topics -- if you course description is a list of topics, I can just use that list)
   Research Question Identification and Clarification
   Experimental Design
   Survey Design and Administration
   Sampling Design
   Database Design
   Data Collection
   Statistical Analysis
   Reporting of Statistical Results

7. Does your class have a component that is not just a lecture (YES/NO):
   YES

8. Rationale for the new course (one sentence - max 250 characters).
   Students outside the Department of Statistics working on a thesis or dissertation often require support from a professional statistician to ensure the quality and validity of their results. This class provides students with access to that support.
